

King County Housing: Pricing Insights

Data Cleaning and Modeling by:
Aaron Chen and Dirk Van Curan

Business Questions

As a company in Bellevue, can you purchase affordable housing for your C-Level employees while keeping their commute under an hour?

Is waterfront property worth the investment?

Does the King County assessor's grade affect price?

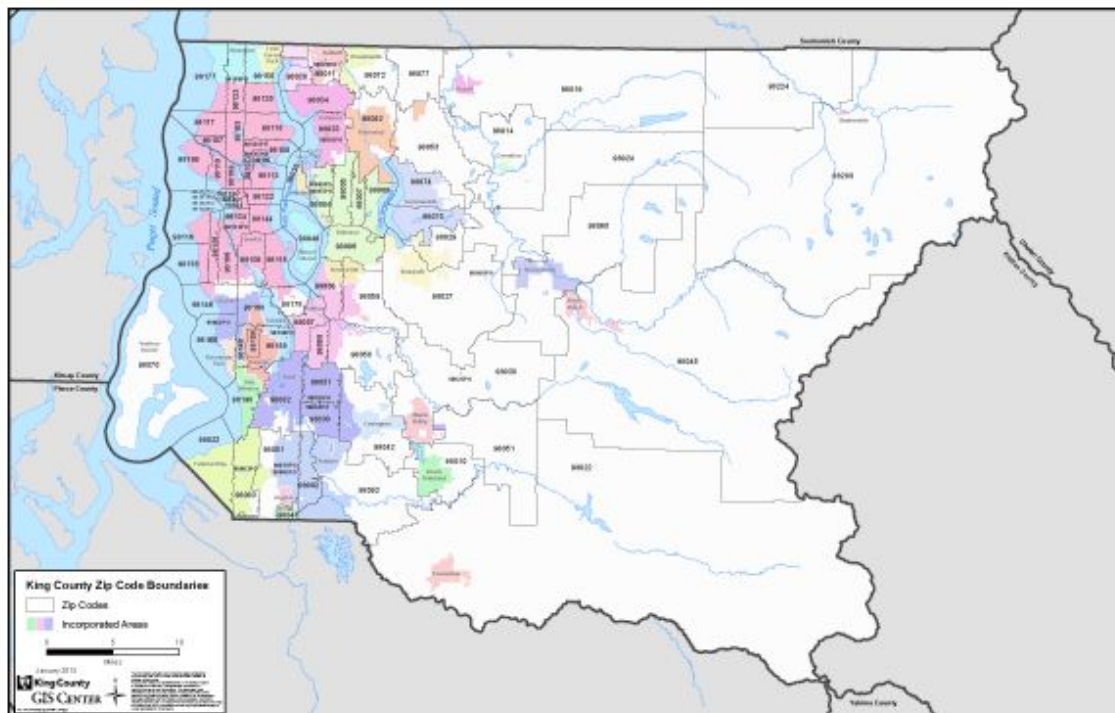

Data Set Used

King County

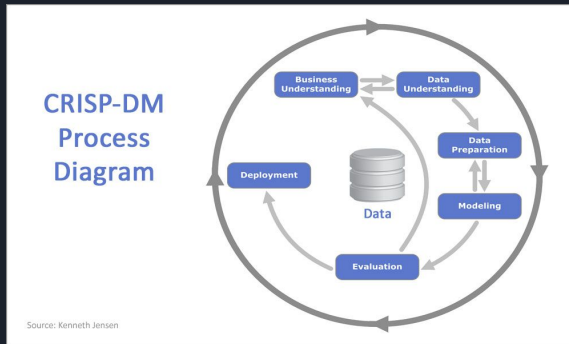

King County Housing
Sales

Sale information for
houses sold between May
2014 and May 2015

Model Approach

1. Clean data - eliminate errors and remove columns that don't add value to solve business problems.
2. Transform columns and generate new columns to fit model.
3. Use Linear Regression and Lasso function to help reduce error.
4. Refit model for accuracy

	0	1
id	7129300520	6414100192
date	10/13/2014	12/9/2014

long	-122.257	-122.319
sqft_living15	1340	1690
sqft_lot15	5650	7639

How does Distance from Bellevue affect Price?

- Distance from the heart Bellevue does see a steady decrease in home prices.
- As the model uses linear distances the prices take a significant step down after approximately 7.1 miles, the distance from Bellevue to the Puget Sound.

Waterfront property

Is it worth it?

1. Yes.. but why?
2. Price certainly has increased when using square footage as the multiplying factor to waterfront.
3. Waterfront provides a baseline higher price, as indicated, than any property without.

What does Grade Tell Us about Price?

Grade, though important as a predictor, was difficult to quantify by itself as it was an arbitrary value given by the assessor of the property at time of sale. By using its predictive power as a multiplier for other values, however gave better insight on the importance of grade in relation to sale price.

Next Steps

- Improve model by seeing how data from more years worth of sales affects the predictive power of our variables
- Develop a better scale for particular variables to better predict price (i.e. waterfront)
